

Type, Identifier and Banks are the Bottom tab's which I attached to the main BANK tab. When I am navigating to any other Tabs like Groups/Extracts/Payment Configuration/ Group Mapping, I would like the below tabs Disables/Hidden.

Is there any way to achieve this?

My canvases are:

1. I have used two tab canvases, one for top 5 tabs and another for below three tabs.
2. All my text items are created in separate stack canvases.
3. All my above said canvases are placed on to a single content canvas.

So in short

1. Content canvas - 1
2. Tab Canvas - 2 (1 for top 5 tabs and the other for bottom tab)
3. Stack canvas - 4 (each for Groups, Extracts, Payment Configuration, Group Mapping tabs)  
- 3 (each for Type, identifier, Banks)

The Requirement is shows as below:
